## Section A. PERSONAL DATA

Name and Surname	Isabel María Pérez de Vargas Sansalvador		
DNI/NIE/Passport		Age	
Researcher's identification number	Researcher ID	L-1098-2016	
	Scopus Author ID		
	ORCID	0000-0002-3666-3231	

### A.1. Current professional situation

Institution	Universidad de Granada		
Dpt. / Centre	Química Analítica / Facultad de Ciencias		
Address	Department of Analytical Chemistry, 18071, Granada		
Phone	958240796	Email	<a href="mailto:isabelpdv@hotmail.com">isabelpdv@hotmail.com</a>
Professional category	Marie Curie Individual Fellowship	Start date	2017
UNESCO spec. code	230100 - Analytical chemistry; 330900 - Food technology		
Keywords	Analytic chemistry; Food chemistry; Gas sensors		

### A.2. Academic education (Degrees, institutions, dates)

Bachelor/Master/PhD	University	Year
Analytical Chemistry (Doctor Europeo- Cum Laude)	University of Granada	2011
Master in Chemistry	Universidad de Granada	2008
Certificado de Aptitud Pedagogica	Universidad de Granada	2006
Master Prevencion de riesgos laborales	INEFE	2006
Degree in Chemistry	Universidad de Granada	2005

### A.3. General quality indicators of scientific production

- 389 total citations
- 18 publications in Q1
- H index = 11

## Section B. SUMMARY OF THE CURRICULUM

My scientific career began at the University of Granada (UGR) in 2006. Since then I have developed a passion for research, realising the importance of industrial engagement to make the research undertaken commercially viable.

I obtained a Master's degree in Chemistry (2008) which subsequently led me onto a PhD program at the UGR (Junta de Andalucía fellowship). I was awarded the "Excellent Cum Laude" (June 2011) which is a given to a candidate upon receiving the highest grade. During my PhD I was awarded with the "Ayuda Actividad Científica of the Junta de Andalucía", which allowed me to travel to the Dublin City University in Ireland where I started a collaboration that last to date, whilst learning new skills that I brought to my laboratory in Spain. This was a four-month visit.

After completion of my PhD, I was awarded with a postdoctoral contract at University of Granada (Spain) for 3 months. I left UGR in October 2011, when I was awarded with the prestigious Marie Curie postdoctoral positionship to go to Cranfield University (UK). There I continued expanding my experience in the field of chemical sensors, including a participation in the ITN Network CHEBANA (Marie Curie Actions, FP7 Program),

In 2013 I got a postdoctoral position at Dublin City University working in the Aquawarn project as postdoctoral researcher. In 2014 I got the prestigious talentia postdoc fellowship (EU- Junta de Andalucía cofunded) as principal investigator with the project entitled SmartPack.

My international experience covers different research groups in Europe (Spain, Ireland and United Kingdom) and those projects opened me the possibility to collaborate with groups in Israel, France, Germany, Italy, Finland and Austria too.

I have also gained experience in the company sector working as materials researcher in the company Inspiralia in 2013-2014.

Last year I was awarded with the important Marie Curie Individual Fellowship to develop my project Multisens, a revolutionary quality indicator platform for the food industry. I am trained in specialised fields of sensing, being an important partner at EU level. My international recognition is demonstrated by the high number of high impact publications; eighteen high impact factor journal publications, one book and one book chapter. This is a great indicator that I have rapidly increased my reputation in the scientific community and my work is widely approved by international peers (Hindex= 11). My participation in research projects with collaborators around the world has been impressive, including 6 EU projects (MultiSens, SmartPack, Aquawarn, Biomush, Adaw and Chebana)

It can be seen that there has been a clear progression in my career path by acquiring positions that have developed my personal and professional skills.

### Section C. MOST RELEVANT MERITS (ordered by typology)

#### C.1. Publications

- 1 **Scientific paper.** Pablo Escobedo; et al. (6/2). 2018. Non-invasive oxygen determination in intelligent packaging using a Smartphone IEEE Sensors Journal.
